GO Analysis
Top 10 terms for BP, CC and MF
BP
CC
MF
RNA splicing
mitochondrial protein−containing complex
structural constituent of ribosome
mRNA binding
ribosome
inner mitochondrial membrane protein complex
unfolded protein binding
chaperone cofactor−dependent protein refolding
'de novo' post−translational protein folding
'de novo' protein folding
mitochondrial respiratory chain complex I
respiratory chain complex I
entrainment of circadian clock by photoperiod
chaperone binding
heat shock protein binding
